

Two Post Parking Lift

Hydro-Park 1120

Revision 2, March, 2023

Hydro-Park 1120 is a new generation car parking lift of two-post type, newly developed for lifting capacity 2000kg. Each lift creates one more parking space, capable of stacking a sedan above a medium SUV on ground. Its compact structure enables smaller cover area than all existing models. Its mechanical lock mechanism prevents potential risks that could exist on similar products. Simplized structure greatly shortens installation period. An ideal product for home garages, apartment buildings, commercial buildings, etc. that with insufficient headroom.

- For dependent parking
  - Each lift offers 2 car spaces
  - Lifting capacity: 2000kg
  - Platform width: 2200mm
  - Lifting height: 1850mm (optionally adjustable)
  - Recommend headroom: >3570mm
  - Ground car height: <1800mm
  - New lock mechanism with superior safety & stability
  - Easier operation with electric auto release function
- Galvanized platform sheets with high rust resistance performance
  - Bolts & nuts withstand 72hrs Salt Spray Test.
  - Driven by hydraulic cylinder + Korean lifting chain
  - Synchronizing chain keeps platform level during working under all conditions
  - Premier surface treatment of power coating enhanced by Akzo Nobel powders
  - Proven quality compliant to CE standards.
